### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 13, line 1, "claim 11" has been changed to - - claim 12 - - .

This amendment is because claim 11 does not recite any "one-step adder key configuration", but "two-step adder key configuration". The "one-step adder key configuration" is first recited in claim 12.

2. The following is an examiner's statement of reasons for allowance:

The prior of record does not teach or fairly suggest a Galois field multiplication having a reduction part for performing modulo division that is carried out in two steps using an expanded form of an irreducible polynomial as recited in claim 1, or having an adder part connected to a first and second input registers and including a partial product adder expansion structure and a partial product adder key structure connected together by four product expansion terminals as recited in claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
